TOL-0017 - Stone details

Cool blue and cyan meet a finer field of green, yellow and orange in this 5.95 ct Lightning Ridge freeform opal. A sweeping band of natural dark potch separates the two color areas, following the asymmetric drop-and-leaf outline.

Natural precious opal with retained dark potch. Translucent color-bearing areas; opaque potch.

Weight and measurements
Recorded weight: 5.95 ct. Approx. 20 x 12 x 5 mm (length x width x thickness), read from caliper photographs and rounded to whole millimeters. Have a jeweler measure the actual stone before making a setting.

Condition
The central band and intentionally unpolished back are natural dark potch, part of the same one-piece stone. The cutter confirms no cracks or chips.

Purchase and cutting history
Purchased directly from Down To Earth Opals (https://downtoearthopals.com.au/) at the Tucson Gem and Mineral Show, then cut from rough by The Opal Ledger. The link identifies the supplier, not an endorsement of this listing. These are our firsthand purchase and cutting declarations. No laboratory report accompanies the stone.

Viewing record
Photographs and silent video show this exact stone. Color changes with light, viewing angle, camera and display. Loose stone only.
